Component Mission

The Office of the Director of National Intelligence (ODNI) Deputy Director of Mission Integration (MI) serves as the Director of National Intelligence's (DNI) senior leader for intelligence integration across the IC enterprise. MI is responsible for ensuring customer outcomes by leading advances in collection and analysis that ensure the quality, timeliness, and utility of insights for the nation's decision-makers. Additionally, MI is responsible for increasing expertise and improving tradecraft at all levels through specialization, integration, and collaboration. MI is responsible for the strategic vision, direction, and planning to deliver a more integrated IC reflecting the collective wisdom of our collection and analytic components to advance, in support of the National Intelligence Managers, the Unifying Intelligence Strategies (UIS).

Major Duties and Responsibilities (MDRs)

Responsible for supporting the Division Chief in leading a large team of data scientists and technical specialists to provide state-of-the-art data management, data science, analytics capabilities, and decision science support for ODNI customers.

Support the Division Chief in managing the compilation and analysis of IC mission performance data to address complex intelligence issues for ODNI and IC decision makers. This includes:

Building and managing IC cloud-based databases (including the Library of National Intelligence).

Forming and leading ODNI and IC-level communities of interest driving strategic changes in business analytics and data-driven decision making and assuring quality control and governance of data sets.

Build, manage, and operate decision science and decision analysis tools and processes to implement data-driven decision-making, including Amazon Web Services capabilities, web development and Sharepoint services, survey and statistical analysis software, data analysis and visualization tools, and custom data processing algorithms, scripts, and tools.

Manage the daily operations of the data science team in obtaining and integrating IC mission performance data sets, conducting data analysis, and producing visualizations and other business analytics products to support IC senior leadership to make informed mission, resource, and programmatic decisions.

Guide the development of systems analysis and statistical methods to assess current and proposed programs and propose alternative courses of action or solutions to promote improved functionalities.
